**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 11 – 17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term 'packing' is indefinite as it is unclear what is being packed.

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term 'figure' is indefinite as its meaning is unclear. For purposes of examination, the axis will be interpreted to mean any axis.

***Claim Rejections – 35 USC § 102(b)***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11 – 17 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Denend et al. (U.S. Patent No. 5,974,972).

With regard to Claims 11 — 12, Van Denend et al disclose a sleeve (carrier sleeve; column 3, lines 17 – 29) comprising an evacuable structure of voids (holes, therefore evacuable and a plurality of voids; column 3, lines 17 – 29).

With regard to Claim 13, the voids run parallel to the axis of the sleeve as shown in Figure 12.

With regard to Claim 14, the sleeve includes an outer lateral surface that is the lateral surface of a right – circular cylinder as shown in Figure 9.

With regard to Claims 15 – 16, the lateral surface includes a recess (channel; column 7, lines 58 – 67).

With regard to Claim 17, discloses a lateral plate (tape; column 7, lines 45 – 49) adjacent to the side, therefore annular, including a cavity because it is adjacent to a hole as shown in Figure 12.

With regard to Claim 20, a method of increasing the outer diameter of a cylinder is disclosed by Van Denend et al (column 7, lines 35 - 41).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc A Patterson whose telephone number is 571-272-1497. The examiner can normally be reached on Mon - Fri 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
